## Package Contents

1 x 10Pin Wiring Harness, 1 x 6Pin Wiring Harness

1 x L & R Side Panels, 1 x Screw Set

Mount all components in locations that will not disturb safe driving or obstruct the motions of vehicle components' functionalities. Take precautions to not damages wires, piping and tanks installed in the automobile. Avoid wet, dusty or extreme temperature conditions during installation.

Any damages resulting to the aftermarket systems or damages to the vehicle resulting from improper installation or careless installation procedure are neither covered by warranty nor are we responsible for injuries or damages resulting from installation process. Please observe cautions when performing the installation.

For installation, we recommend to use matching 16-14 gauge male & female bullet connectors.

## Before Installation Process

- \* Always disconnect the negative (-) terminal of the vehicle battery and drain all capacitors before installation.
- \* Protect all wire harness placed near any metal parts of the vehicle with loom or other wire protection.
- \* Always check all vehicle functions after completion, such as Braket Lamps, Turn Signals, Wipers etc.
- \* Before starting installation, verify that the original audio system in the vehicle is fully functional. This kit will not remedy any issues that existed before the install or faults in the original system in the vehicle.
